**DETAILED ACTION**

- 1. Applicant's election of Claims 1-8 without traverse in Paper dated April 22, 2004 is acknowledged.**
- 2. Claims 1-8 are free of the prior art.**
- 3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.**

**The application has been amended as follows:**

**In the Claims:**

**Cancel claims 9-10 non-elected without traverse in paper dated April 22, 2004.**

- 4. The following is an examiner's statement of reasons for allowance:**

**The invention relates to a method of forming a plurality of composite parts via resin transfer molding in a single molding cycle.**  
**The method comprising the steps of providing a mold having a first and**

**second mold members which cooperate to define a mold cavity; providing a plurality of shims; loading a plurality of preform work pieces into the mold cavity such that at least one of the shims is disposed between each of an adjacent pair of the preformed work pieces; injecting a liquid resin into the mold cavity, curing the liquid resin to thereby form a cured work piece matrix that is composed of a plurality of semi finished composite parts and at least one shim and separating the plurality of semi-finished composite parts and at least one shim from one another. The method is capable of producing a plurality of highly consistent molded parts in a single in single molding cycle. The process produces multiple composite parts in one cycle thereby reducing the frequency that the tool is reprocessed and reduces resin waste.**

**Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."**

**5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Folsom et al.'692 and Folsom et al. '979 teach resin impregnated methods employing shims but the shims are used for shimming the mold not for shimming the work pieces as claimed.**
